

ABUS 125/150

Tootekirjeldus

ABUS offers a wide range of security latches at different security levels. You can recognise these hasps, for example, by concealed screws. In addition, hardened steel eyelets for the padlock shackle are encapsulated inside the hasp and thus provide optimum protection against break-in attacks. Together with the appropriate padlock, the hasp then ensures the highest level of security when securing the door and gate. The ABUS 125 hasp is suitable for flush doors, i.e. the door panel and door frame are on the same level. To prevent unauthorised access, a padlock should be used, e.g. the ABUS Titalium 64TI/40.

Technologies:

- Extra strong hinge
- Hardened staple
- Including coach bolts and back plates
- Corrosion protected
- Hidden screws
