

ABUS 55

Tootekirjeldus

With the brass lock 55, the lock body is made of solid brass. The hardened steel shackle and the internal parts made of corrosion-free materials ensure the longevity of the lock. Inside, a precision pin cylinder with mushroom head pins is used. The exterior is protected from wind and weather. Locking is done without a key by pushing down the shackle. The application possibilities are wide-ranging: You can use it, for example, to secure loop cables or to secure doors, gates, cupboards, lockers, tool boxes, cellar windows, sheds, switchgear or barriers.

Technologies:

- Body made of solid brass
- Inner components made of non-corrosive materials
- Shackle made from hardened steel
- Precision pin tumbler cylinder
- Self-locking: locking without key by pushing down the shackle

Operation and use:

- Basic protection
- Cobra loop cables, doors, gates, cabinets, lockers, toolboxes, cellar windows, sheds, switchgears, barriers
