ABUS Phantom 8950 Coil Cable Lock

This bike lock impresses with its unproblematic application as well as its noble design.

The spiral cable lock PHANTOM™ 8950 by ABUS allows for a super fast application for several reasons. For example, once you have put the bike lock around your bike or around a fixed object, you no longer need a key to lock it. Thanks to the ABUS Extra-Classe automatic cylinder, there is no need to search for a key and you save valuable time. And if the bike lock is not needed, you can quickly attach it to the innovative holder with magnetic function. Simply insert it into the holder - ready. However, the PHANTOM™ 8950 spiral cable lock is not only practical, it also looks particularly good thanks to its plastic casing in a matt black finish.

Features of ABUS Phantom 8950 Coil Cable Lock:

- Good protection with a low risk of theft
- Recommended for securing inexpensive two-wheelers
- 12 mm thick, high quality and super flexible spiral cable
- Plastic sheathing in a matt black finish to protect against damage to the paintwork
- ABUS Extra-Classe (EC) automatic cylinder with coded reversible key
