

Võutmete lõikamismasin Keyline Carat

Tootekirjeldus

- Professional key cutting machine for flat keys for cylinder and car locks, and cruciform keys.
- The selection of the clamp side is especially simple, quick and convenient: just press the lifting lever to rotate the mechanism until the most appropriate face is displayed.
- The specific button to start the supplied brush is a guarantee of safety.
- The protection casing hermetic layout facilitates brushing and prevents swarfs from coming into contact with the transmission mechanisms.
- Safety, convenience, ease of use, flexibility and rapidity of cutting are the main advantages offered to the user, thanks to Carat's technological novelties.
